

Yash Srivastava

SENIOR SOFTWARE ENGINEER | MOBILE PRODUCT ENGINEERING | OTT, FINTECH, STOCK BROKING & AI

officialyash2616@gmail.com | +91 8604802120 | LinkedIn

SUMMARY

Senior Software Engineer with 6+ years building high-scale mobile products across OTT, fintech, and AI. Flutter specialist experienced in leading teams, shipping data-driven features, improving application performance, and building AI-assisted engineering workflows.

PROOF OF IMPACT

- **Growth & conversion:** Subscription Card average monthly spend per active user ~\$90 → ~\$120 (+33%); Mortgage activation 10% → ~20% (2×); 25–30 qualified mortgage leads/month.
- **Engagement & retention:** DAU +7% across a product with a 40M+ user base; media consumption +10%; average monthly watch time 5.5 → 6.0 hours (+9%); Month 1-to-Month 2 retention +5%.
- **Performance & efficiency:** Boot-time requests –50%; server load reduced 2.5×; operating cost –22%; app size 160 MB → 65 MB (–60%); test coverage 25% → 80%.
- **Delivery velocity:** STAGE TV app delivered from scratch to production in under 2 weeks; AI-powered fitness app user engagement +20%; workout workflows +30%.
- **Product scale:** 40M+ users on STAGE; 1M+ users for iTribe; 150K+ games played and 45K+ users for Funzo.

EXPERIENCE

MADE CARD — TEAM LEAD

Sep 2025 – Present · New York

Flutter · Firebase · Amplitude · AppsFlyer · Integration Tests · A/B Experiments · Patrol

- **Product owner** for Mortgage Calculator and Subscription Cards—defining PRD, user journeys, cohorts, conversion funnels, and the lead-generation objective for third-party mortgage vendors.
- Led the mobile team, owning and implementing end-to-end architecture, release management, mentoring, and product collaboration to accelerate delivery.
- **Increased monthly average Subscription Card spend from ~\$90 to ~\$120 per active user** through 2–3 iterative A/B experiments across copy, user flows, and CTA placement.
- **Doubled user activation from 10% to ~20%** and generated 25–30 qualified partner leads each month by iterating on the Mortgage Calculator's form flow, CTA placement, and funnel copy.
- **Equipped management with product-real-estate insights for third-party aggregator negotiations** by building a scalable mobile analytics framework for element-level clicks, views, and engagement heatmaps.
- **Enabled funnel tracking, user segmentation, and data-driven product decisions** by establishing Firebase Analytics and Amplitude.
- **Reduced app size from 160 MB to 65 MB (~60%)** through on-demand remote asset delivery and intelligent local caching, improving install accessibility and contributing to stronger organic app-store discoverability.
- Streamlined implementation by creating **AI-assisted workflows** with Cursor and Claude, automating Flutter scaffolding from Linear and Figma, and building a Slack-integrated admin portal.

STAGE OTT — SENIOR SOFTWARE ENGINEER

Jun 2024 – Sep 2025 · Noida

Flutter · Browserstack · Integration Tests · Firebase · Clevertap · Datadog · OTT · Payments · A/B Experiments

- **Improved user engagement and increased DAU by 7%** across a platform with a 40M+ user base by leading the mobile team building Shorts and Micro Drama experiences.
- **Made the STAGE TV app production-ready in under two weeks** by building it from scratch with AI agents and extending the platform to large screens.
- **Increased average monthly watch time from 5.5 to 6 hours** and improved **Month 1-to-Month 2 retention by 5%** through a year-long, independently led experimentation program across copy, first-time user experience (FTUX), and content-presentation approaches.
- **Cut boot-time requests by 50%, reduced server load 2.5×, and lowered costs by 22%** by removing duplicate API calls, optimizing data logic, and adding lazy loading.
- **Contributed to a 2% increase in TAM** by implementing UPI Collect and simplifying user transactions.
- **Delivered an 8% relative jump in media consumption** by building content filters, Watchlist, and Like/Dislike features.
- **Preserved ad-set-level AppsFlyer attribution** for users signing up after the 7-day window by creating a temporary device-ID-to-attribution mapping and backfilling it at signup to close the attribution loop.
- Improved integration **test coverage from 25% to 80%**, significantly increasing confidence in releases and reducing regression risk.

EXPERIENCE CONTINUED

SPYN INC. — SENIOR SOFTWARE ENGINEER

Sep 2023 – May 2024 · Redmond

Flutter · Flutter Web · Firebase · Backend services · Fitness-as-a-Service SDK

- **Boosted user engagement by 20%** by developing an AI-powered fitness trainer application using Flutter.
- **Streamlined workout workflows by 30%** by building a Flutter Web platform and backend services for a Fitness-as-a-Service SDK.
- **Integrated Whisper AI** to analyze trainer-client calls and text, surfacing real-time mood, training needs, conversion signals, and retention gaps for trainers.
- **Designed Flutter app-to-app handshake** protocol for secure client SDK integration, protecting backend APIs via a private inter-app communication layer.

ITRIBE — SOFTWARE ENGINEER

Jan 2022 – Sep 2023 · Bengaluru

Flutter · Datadog · Firebase · Stock market · Wallet & KYC · Payments · Clevertap · UXCam

- **Reached a user base of 1M+** by developing iTribe, a real-time news and stock market application.
- **Expanded the product experience** by leading the Flutter team building Flash News, Watchlist, Social Interaction, Live Stock Pricing, and two educational games with a micro-frontend architecture.
- **Supported a real-money gaming platform with 150K+ games played and a 45K+ user base** by building secure Wallet and KYC services for Funzo.
- **Drove 50K+ completions across 14 financial-literacy courses** by building an interactive, dynamic page-based module with a reusable course → lesson → page architecture.

INFOSYS LTD. — SPECIALIST PROGRAMMER

Aug 2021 – Jan 2022 · Bengaluru

Flutter · Provider · BLoC · Mobile & web applications

- **Delivered and maintained client mobile and web applications** using Flutter.
- **Shipped production features** using Provider and BLoC architectures.

CORE COMPETENCIES

- **Mobile architecture:** Flutter, Dart, Jetpack Compose, BLoC, Provider, scalable app architecture, micro-frontends, mobile and web delivery.
- **Product & growth:** Product ownership, user journeys, cohorts, conversion funnels, lead generation, activation, retention, and engagement.
- **Experimentation & analytics:** A/B testing, hypothesis design, funnel analysis, Firebase Analytics, Amplitude, AppsFlyer, user segmentation, and element-level interaction instrumentation.
- **Performance & experience:** Local caching, on-demand asset delivery, app-size optimization, API and startup optimization, lazy loading, media playback, FTUX, and large-screen experiences.
- **Delivery & leadership:** Mobile-team leadership, mentoring, release management, cross-functional product collaboration, and data-driven feature delivery.
- **AI-assisted engineering:** Cursor, Claude, OpenAI APIs, Whisper AI, Linear/Figma workflow automation, and automated Flutter scaffolding.

TECHNICAL SKILLS

- **Languages:** Dart, Kotlin, Python, C
- **Mobile:** Flutter, Jetpack Compose, BLoC, Provider
- **Analytics:** Firebase Analytics, Amplitude, AppsFlyer, CleverTap
- **Release & Monitor:** Firebase Crashlytics, Remote Config, Cloud Functions, App Distribution
- **Tools:** Git, Figma, Whisper AI, Claude, GPT, Cursor, Linear, Jira
- **Database:** SQL, NoSQL, Firebase Firestore, Realtime Database
- **Observability:** UXCam, Datadog, Sentry
- **Testing:** Browserstack, TestMu AI (formerly LambdaTest), Patrol

EDUCATION

PSIT Kanpur — Bachelor of Technology in Information Technology with Honors · CGPA: 8.32 / 10.0 2021 · Kanpur, UP
